PROFESSIONAL SUMMARY

Full-Stack Software Engineer at SAP Labs (2+ years) with a track record of owning cloud-native applications end-to-end — from architecture through CI/CD to production. Proficient in Java (Spring Boot), JavaScript/TypeScript (Node.js, React, SAP UI5), and Python; experienced in LLM/RAG systems, vector databases, mutation testing, and SAP BTP deployments.

PROFESSIONAL EXPERIENCE

SAP Labs — PP3 Software Engineer, S/4HANA Test Engineering (i-ScOper)	Bangalore, India Jan 2026 – Present
- Took sole end-to-end ownership of Scheduling Solutions; extended integrations from 1 to 2 (START & QMATE), architected a tool-agnostic extensibility layer, and shipped a daily automated report that surfaced ~1,000 latent defects — all remediated before customer impact. - Engineered 5 CI/CD pipelines from scratch (GitHub Actions + Piper; SonarQube, CodeQL, and CheckMarx quality gates) covering all backend services and UI suites; deployed to SAP BTP Cloud Foundry with zero-downtime production releases. - Established team-wide GitHub best practices — branching strategies, PR review workflows, and automated quality gates — improving team velocity and code reliability across the full application suite.	
SAP Labs — PP2 Software Engineer, Cloud ALM (Next-Generation Data Collection Infrastructure)	Bangalore, India Jun 2025 – Dec 2025
- Primary contributor (195+ commits) to the NG-DCI routing core (approuter, distributor, admin UI); pioneered Stryker and PiTest mutation testing across 5 platform applications, achieving 90% mutation coverage and substantially reducing defect-detection blind spots — a first for the team. - Resolved all SonarQube-flagged violations (code smells, security hotspots, coverage gaps) across the entire 5-application stack, bringing every project to green quality gate status. - Delivered a full-stack Excel bulk-upload feature (Node.js + SAP UI5 + SAP HANA) for LoB data ingestion; co-engineered FISH — a production RAG chatbot (Python, Neo4j, Ollama) now deployed to SAP Cloud and used enterprise-wide.	
SAP Labs — PP1 Software Engineer, S/4HANA Test Engineering (i-ScOper)	Bangalore, India Aug 2024 – May 2025
- Architected and delivered the i-ScOper 3.0 Wizard — a full-stack SAP UI5/Fiori application deployed to SAP BTP that unified all i-ScOper use cases, reducing onboarding friction for users across S/4HANA test engineering. - Built the Sustainability Dashboard (SAP UI5 + Spring Boot + oData) for real-time test-coverage and quality metrics surfaced to S/4HANA program owners; designed the i-ScOper 3.0 brand identity adopted platform-wide.	
ENORD.CO <i>Web Development Intern</i>	Remote Aug 2023 – Nov 2023
Built production-ready React.js frontend features for an AI-driven drone startup platform; improved performance via component-level refactoring, measurably reducing load times and boosting user engagement.	

PROJECTS

Scope Comparator <i>Spring Boot, Java 21, React 18, TypeScript, SAP HANA, SSE, OAuth</i>	Jan 2026 – Present
Full-stack internal tool for S/4HANA test engineers; streams parallel AI scope analysis in real time via SSE across 4 proposer + 1 analyzer endpoints; 6-page React UI with BC badges, group investigation, and filter system. 53 commits, 17 PRs — deployed to SAP BTP.	
FISH — Enterprise AI Chatbot (Production) <i>Python, RAG, Neo4j, Ollama, Streamlit, Jenkins</i>	2025
Live production SAP product: RAG pipeline ingests internal wikis via SSO crawler, serves LLM-grounded, role-aware responses to SAP employees enterprise-wide; CI/CD via Jenkins, SonarQube integrated, full documentation site.	
NOVA — RAG Chatbot <i>Python, Llama3, bge-large embeddings, Neo4j, Streamlit, Ollama</i>	2025
End-to-end RAG pipeline: SSO wiki crawler → HTML-to-Markdown chunking → vector embeddings → Neo4j → multi-chat Streamlit UI; one-click automated setup script bootstraps the entire stack. 70 commits.	
Project Management Suite <i>Node.js, Express, React, PostgreSQL, Supabase, JWT, Realtime</i>	2025
Full-stack multi-tenant PM platform with JWT authentication, real-time collaboration (Supabase Realtime + RLS), REST API backend, and responsive React frontend; deployed on Vercel + Netlify.	
AITalk CLI <i>Python, Groq API, LLM</i>	2025
Conversational LLM CLI assistant powered by Groq API; 32 commits, open-source, published as a standalone tool on GitHub.	

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL
Frameworks & Libraries: Spring Boot, Node.js, Express.js, React.js, SAP UI5, SAP Fiori, oData, Spring Data JPA
AI & LLM: RAG Pipelines, LLM Integration, Prompt Engineering, Vector Embeddings, Neo4j (Vector DB), Ollama, Groq API
Testing & Quality: Stryker (Mutation), PiTest, JUnit, SonarQube, CodeQL, CheckMarx SAST, Unit & Integration Testing
Cloud & DevOps: SAP BTP, SAP Cloud Foundry, SAP HANA, GitHub Actions, CI/CD, Piper, Supabase, Vercel, Netlify, Docker, Git

EDUCATION

BITS Pilani (WILP) <i>M.Tech in Software Engineering — CGPA: 7.987</i>	2024 – 2028
IITM, GGSIPU, Delhi <i>Bachelor of Computer Applications (BCA) — CGPA: 9.16</i>	2021 – 2024

ACHIEVEMENTS

NPTEL STAR Learner: Top-performer recognition in 3 courses (Cloud Computing, Data Analytics, IoT) among thousands of national aspirants; certificates presented at IIT Kanpur.

SAP Recognition Awards: Multiple appreciation awards at SAP Labs for outstanding product delivery, cross-team collaboration, and internal events across two rotations.
